day The God Patent:

1 of 1 review helpful A highly readable first in a virtually unexplored new genre neither Science nor Fiction nor SF but Science in Fiction By Brian J Boyle OK to be clear if you re looking for the satiric wit of Literary Nobelists Shaw or Sinclair Lewis the intellectual complexity of Bergson Camus or Bertrand Russell the depth of character of Faulkner Pearl Buck or Toni Morrison the narrative power of Hemingw Sex drugs and quantum physics collide with artificial intelligence faith and free will in this perspective altering story The memo said they d get bonuses for submitting patents so why not Money came easily during the dot com boom Concealed in engineering jargon Ryan McNear submits a patent for the soul disguised as a software algorithm and his best friend Foster Reed rewrites Genesis and calls it a power generator A few years later amid the fallout of a rup classic battle between faith and free will with unusually deft infusion of legitimate but accessible science a narrative that sings of the heart and the scientific method as two parts of the same song San Francisco Chronicle
